EDUCATION

Savitribai phule pune university

Mca, masters of computer applications

Pune, Maharashtra Aug.2021–Sep 2023

PROFESSIONAL SUMMARY

To become a vital part of the organization, where I can effectively contribute my skills for the growth of the organization through hard work & determination in the most effective manner.

WORK HISTORY

AYS SOFTWARE SOLUTIONS (2 years+)

Pune, India
Nov. 2022 – Dec

Software developer 2024

1) Horeca1 (1.5 year) : (multi-vendor ecom platform)

At Horeca1, I led the 80% of the **Back-end** development of a B2B platform designed to streamline transactions and workflows between wholesale vendors and the hospitality industry. In this project we implemented our in house authentication **micro-service** using **jwt** and other supporting back-end services and a **notification-service** to support all types of the notifications throughout the system

2) Coalitionify (6 months) : (Sass platform)

Due to its unreleased status, I cannot disclose specific details about Coalitionify. However, I played a key role in its development, focusing on designing and implementing critical features like **real-time collaboration**, **notification-service**, **authentication-service** with auth provider libs, to ensure a seamless and scalable user experience.

Tools and Technologies:

- Micro-services Architecture: Built using the NestJs framework, likely with independent services for
 - different functionalities (e.g., **auth service**, **organization service**, **notification service** and more). Incorporated **JSON Web Tokens (JWT)** for secure user authentication and authorization, this helped scaling the app and helped client app to serve 80% more active users
- **Databases**: Utilized **MySQL** and **Mongo Db** for data storage.
- Object-Relational Mapping (ORM): Implemented Sequelize ORM and mongoose for complex db queries
- Restful Apis: Designed and implemented Restful Apis for communication between different parts
 of the platform and potentially external applications. Using swaggers documentations helped
 thousands of apis to be consumed effortlessly to speed up integration by 40%
- **Deployment and maintenance**: AWS EC2, S3 services, AWS SMTP, Docker, Cloud-watch
- **Third party integration :** Successfully integrated Zoho Inventory, Web socket, redux toolkit, ui libs, whats app Apis, 91Msg, using these integrations helped client save 80% to 90% costing
- Agile methodologies: used tools like JIRA, and zoho Sprints for agile process

PERSONAL PROJECTS

Portfolio (https://portfolio-amn-xdgg.vercel.app/home):

Built my portfolio with next js and shaden, have been trying to add all new features on the go as I learn something new, site has all the other project links check out from there. (site it under development)

Cordenbleu:

online ecommerce for sports clothing brand

TECHNICAL SKILLS

JavaScript (ES6) Node.js React is **TypeScript Express**[s Next is HTML5 NestIS Shadcn CSS3 Sequelize Matrial ui Docker Mongoose Tailwind css Jira Web sockets Redux toolkit Github MySql Recoil Mongo db Turborepo

Tools and Technologies:

Programming Languages: JavaScript, TypeScript, Python

Developer Tools: Git-hub, Docker, Vs-code, Jira, Postman, Figma, Notion, monorepo

Frameworks: NodeJs, ExpressJs, Nestjs, ReactJs, Nextjs

Personal Details:

Date of Birth: 15th August 1999.

Current Address: Aai niwas adarsh nagar bavdhan pune, maharashtra

Permanent Address: Gund plot paranda road, barshi Taluka-Barshi, Dist.-Solapur.

Gender: Male

Marital Status: Single

Languages Known: English, Hindi, Marathi

Nationality: India

Declaration:

I hereby declare that the above-mentioned information is correct up to my knowledge and I will solely be responsible for any discrepancy found in them.

Yours sincerely, Aman H Kazi
